West Nile Virus Continues to be Active in Placer County

--Placer Mosquito and Vector Control District will be increasing adult mosquito control operations over the next 72 hours --

ROSEVILLE, CA --West Nile Virus positive mosquito samples and high mosquito population numbers continue to be reported today across western Placer County.

To minimize the threat of transmission of West Nile Virus and to manage populations of mosquitoes, the Placer Mosquito and Vector Control District will be conducting aerial adulticide treatments over agricultural areas, and truck-based adulticide treatments in and around populated areas. All control operations are subject to favorable weather conditions.

JOEL BUETTNER
GENERAL MANAGER
