Roof Rat, Tick and Disease Control Assessment Ballot Measure Approved

The Placer Mosquito and Vector Control District is pleased to announce the approval of the Expanded Services and Permanent Facility Assessment Measure. This measure, which was decided by mailed ballots to all property throughout Placer County, was supported by a weighted 64.74% of ballots returned.

After receiving the ballot tabulation results, the Placer Mosquito and Vector Control District Board of Trustees voted unanimously to form the assessment district.

Placer Mosquito and Vector Control District’s General Manager, Mitch Bernstein, stated that “through this ballot measure, property owners have indicated a strong desire to invest in their community and believe this investment will pay off many times over. Now, the District has a clear mandate from local property owners to respond to vectors such as roof rats and ticks, and other vector-borne diseases. Also, with this strong support from our community, we will finally be able to start the process to move out of our temporary, double-wide trailer and establish a permanent laboratory and vector-control facility!”

For more information regarding the proposed improvements, please contact Mitch Bernstein at (916) 435-2140.
